

NOT JUST A WATERJET...[®]

WARDJet News - December 2009

FABTECH '09

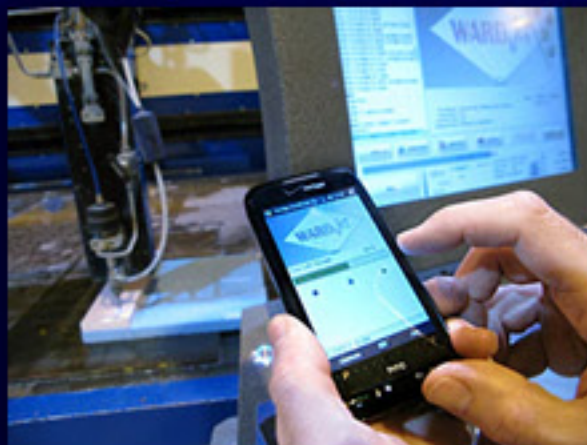

We're back from FABTECH and it was great seeing everybody there! One of the questions we were asked a lot was "Does WARDJet have an abrasive removal system?". Our answer was "YES we have the AROS Waterjet Abrasive Removal System! With our system in place you can keep your waterjet running longer and minimize your down time." Call today and reserve your AROS! (330) 667-9100

Wightman Stewart

Wightman Stewart, now distributing WARDJet waterjets in the UK, has proven to be a great company to work with. We are glad to have them on the WARDJet team as our exclusive distributor in the UK. If you are in the UK and interested in waterjet you should definitely get in contact with them. Phone: 01422-823-801

Use your Windows Mobile Phone to control your Waterjet

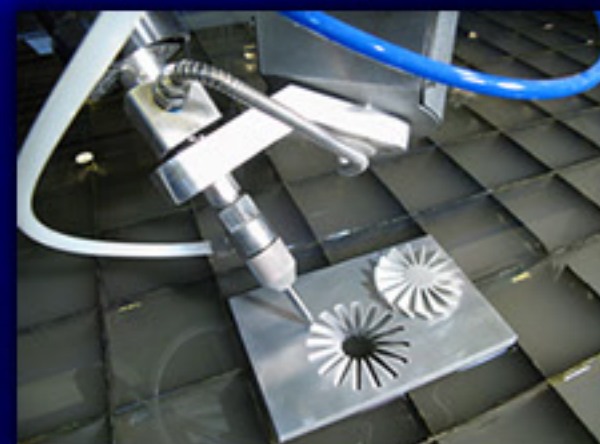

Using the same software we use on our PDA Pendant we can enable your Windows Mobile Device to run your waterjet via WiFi or Bluetooth. Having this flexibility saves you time which saves you money and makes things easier on you and your busy day.

Don't stop at 55° or 60°

With the Psy-Winder 5-Axis cutting head you can cut up to 90° so you can truly cut in 3D

Don't forget to check the blog for daily updates

Stay tuned for more news and information.
Sincerely,
The WARDJet Team
