

NOT JUST A WATERJET...

We Want Your Used Waterjet Abrasive!

Stop paying to have your abrasive removed from your facility today!

Through a partnership with GMA, WARDJet will arrange to pick up your used abrasive and transport it to an abrasive recycling plant. Why? Because Abrasive Recycling Works!™

Too good to be true? Nope! This is it. All you have to do is have your abrasive in bags and if your location is within the *FREE ABRASIVE PICKUP ZONE™ shown below, your abrasive may be removed free of charge. If you are located outside of the *FREE ABRASIVE PICKUP ZONE™ there will be a very nominal charge (as low as 1/4¢ per lb) to have the abrasive picked up and removed from your shop.

*As of April 24, 2009 abrasive pick up may be free in the blue area shown. Yellow area shown could be as low as 1/4¢ per lb. An actual quotation will need to be obtained for locations in the green area shown. Call or email for verification. This will depend on final location, shipping costs, oil price and regulations governing transport of used abrasive. Click here to see if you qualify for WARDJet's FREE ABRASIVE PICKUP™. (This offer subject to change without notice.)

Own a WARD Abrasive Recycling unit already?

No problem, we will pick up your undersize waste abrasive while you get to use the good stuff yourself immediately.

How this works:

Follow the easy steps below, and you may be able to immediately stop paying to dump your abrasive.

- Install a WARDJet 'AROS' or Abrasive Removal Only System in your waterjet tank. This will remove the abrasive and sludge in your tank and deposit it into WARDJet Used Abrasive Bags™. All the AROS needs to run is a compressed air hose - piece of cake. Compact. Simple. The unit has an extremely small foot print and ships on a standard pallet.
• The AROS can be easily installed in most any waterjet tank with our clear and easy to follow directions with photos and videos to help.
• The AROS is affordable. Starting at just \$6,800, the AROS comes with everything you need to get going. This will start paying for itself immediately as you may not need to pay to have your abrasive removed - we will organize to have it picked up from your building.
• The AROS is the front end of the WARD PRO - the proven and tested abrasive recycling system, so when and if you ever want to recycle your own abrasive you are already set up to get started!
• Unless you are using some off the wall abrasive, you qualify. All of the major brands of garnet abrasive will be considered.

Abrasive Removal Only System Starting at just \$6,800
