

# What sets WARDJet apart?

At WARDJet we are constantly working on new ways to build a waterjet and stay on the cusp of technological advancements. We enjoy a challenge and customize every waterjet based on its final application. At WARDJet there is a sense of responsibility for every machine built and for every customer. To us you are not just another customer but rather a partner. We want to work together with you to ensure your success. Part of this is our ability to innovate and customize while maintaining a high level of quality with our in-house fabrication. We know technology and our customers' needs can change frequently, that's why all WARDJet waterjets are fully upgradable; today and well into the future.

## **Psy-Winder**

5-axis cutting head.  
Featuring a wide 90° cutting angle,  
height sensor and crash sensor.

## **ZX-2543**

Abrasive & Pure Water  
Designed specifically for overseas shipping.  
Featuring Pys-Winder and safety shields.

## 24/7 Tech Support

At WARDJet we take a different approach to Tech Support that allows us to give each and every customer the attention to detail that is needed to maintain quality. We use the latest technology available to us to allow us to stay organized and do things that were just not possible before.

To WARDJet, every customer is of high priority whether they be a small job-shop or a full production factory. With our advanced service & support tracking system we can ensure that due focus is given to every issue. Our controllers are built with internet connectivity, webcam, remote diagnostics and the ability to

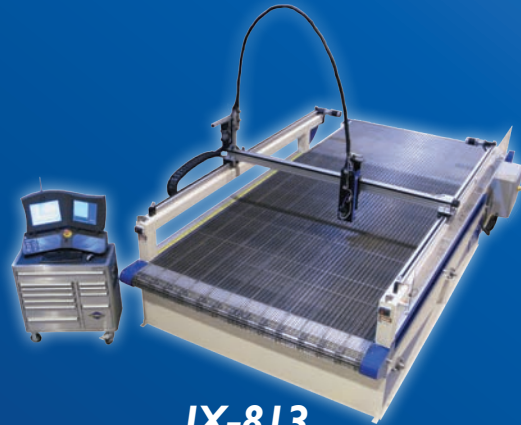

remotely access your controller. This allows us to assess your issue on the spot and quickly diagnose and solve your problem. Our waterjets are engineered to be easily serviceable and all manufacturer part numbers are given for easy parts replacement.

If you are looking to learn more or need to fix a common problem visit our website which is packed with videos, schematics, manuals, guides and free downloads. All of this content is easily accessible right at your controller. We at WARDJet are continually working to provide you with the knowledge and support to get the most out of your waterjet.

Pure Water Only  
Featuring speeds of 2500 in/min (42 in/sec) and chain feed system.

## Our Company

WARDJet Inc., located in Tallmadge, Ohio is an innovative and creative manufacturer of over 30 standard size abrasive waterjet cutting machines. We continue to grow and our factory floor is filled with activity and excitement. Our shelves are stocked with an array of parts ready for assembly and we are always ready for new orders whether it's a standard or custom machine. We design and build the Psy-Winder 5-Axis Waterjet Cutting Head, the AROS Waterjet Abrasive Removal System, the XL Waterjet

Controller and the X-Classic Waterjet Controller in our factory. Other features and options include drilling, tapping, marking, etching, height-sensing, digitizing, 100% remote operation, built in cameras and more!

**NOT JUST A WATERJET...**
